SUMMARY

Junior level full stack developer with 2 years of experience, skilled in JavaScript, React.js, Node.js, and MongoDB. Developed and deployed a full-scale e-commerce application at Senior Steps, increasing user engagement by 50% and processing over \$200,000 in transactions in the first six months, demonstrating strong expertise in both front-end and back-end development.

EXPERIENCE

ui developer

edrak

egypt

- Designed and implemented user-friendly interface components using React.js, reducing user interaction time by 25% and enhancing overall customer satisfaction based on user feedback surveys.
- - Enhanced application performance by implementing server-side rendering with Node.js, resulting in a 30% increase in load speed and improved user engagement across a platform serving over 1 million monthly users.

full stack developer

senior steps

August 2020 - November 2022, egypt

- Developed and deployed a full-scale e-commerce application leveraging React.js for the front-end and Node.js with MongoDB for the back-end, increasing user engagement by 50% and processing over \$200,000 in transactions within the first six months.
- - Enhanced website performance metrics by implementing SEO best practices, resulting in a 40% increase in organic traffic over six months using Google Analytics and SEMrush tools.
- Developed and maintained 10+ dynamic web applications using Node.js, achieving 30% faster load times and enhancing user experience through optimized backend processes, over a period of 24 months.

PROJECTS

login 3d form

Charcoal • January 2024 - July 2024

- You must create a website that will mainly provide customer support for the company. The goal is to emphasize the brand's values. Besides the landing page, the website will need an information page, product pages and a blog. The landing page should have a Contact Us section. There should be a call to action to get users to subscribe to the newsletter. They would prefer a monochromatic design, and would like you to use the brand color, which is red. Take into account the client's preferences and values.

website easy to navigate

Mahogany • January 2024 - January 2023

- You must create a website that will mainly spread brand awareness. The goal is to make the website easy to navigate. Besides the landing page, the website will need an about page, shop page and a privacy policy page. The landing page should have an About the Team section. There should be a call to action to get users to view the catalogue. They would prefer an old-fashioned design, and would like you to use the brand color, which is grey. Take into account the client's preferences and values.
